

Keep eating meat, keep growing, get richer...

Environmental pressure across all planetary boundaries will be breached with BAU scenario

Meat production will be a major part of that.

Options for keeping the food system within environmental limits. $Springmann\ et\ al\ 2018$

Planetary Option Space - What is possible?

Options for solutions that startups can and are building combine **diet** change, **tech** optimisations and **waste** reduction.

Options for keeping the food system within environmental limits. Springmann et al 2018

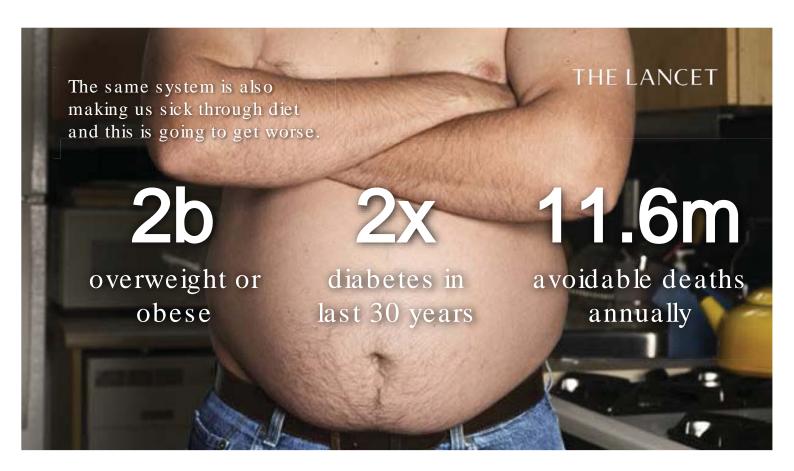

Diet scenario	Tech scenario	Loss and waste scenario	GHG emissions			Cropland use			Bluewater use			Nitrogen application			Phosphorus application

Business as usual.

Better diet + best tech optimisation + max waste reduction.

Planetary Health Diet

THE LANCET

The Lancet commission proposed some guidelines

84%

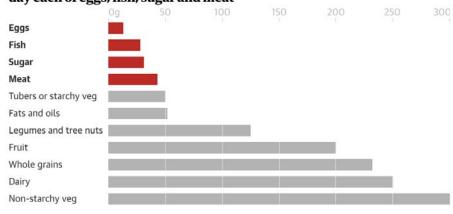

less red meat

6x

more beans and lentils

A person following the planetary health diet would eat less than 50g per day each of eggs, fish, sugar and meat

Guardian Graphic | Source: EAT-Lancet Commission

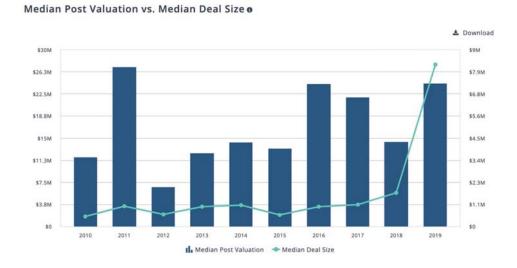

Signals in Agtech investment

Deal sizes increasing greatly in agtech - investment activity enduring

Pitchbook shows that Agtech deals levelled up in 2016 and are now growing in size, presumably as companies mature and need larger rounds.

Diet

Some companies

Plant-based meat

Signals

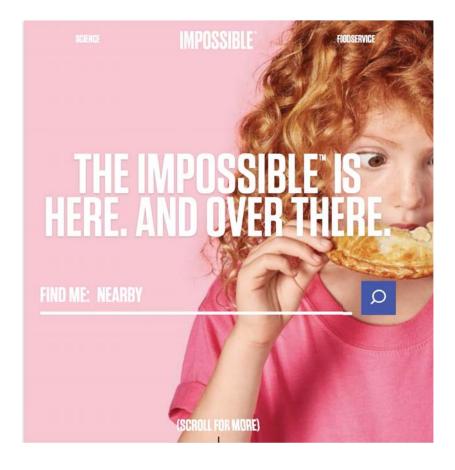

Valuation: **\$1b** Raised: **\$477m**

Pull

Health by stealth. Less meat, more plants in diet.

Motif Ingredients

Ingredients for plant based food through fermentation

Signals

90m Series A! Spin out of Ginkgo Bioworks. Ex president of R&D at Pepsico

Pull

Industries making alternatives to meat need base ingredients.
